PAPA'S LETTER

I was sitting in my study,
Writing letters, when I heard,
"Please, dear mamma, send me
Mamma's letter to me."

"Not now, dear mamma, I'm busy
and I don't have time to write
letters to you, my dear little
son."

"I would just like to see
Mamma's letter to me, please
send it to me, please, please
send it to me, please, please."

"No, no, no, my dear little
son, I can't do that. I'm
too busy to write letters to
you, my dear little son."

"Mamma, please, please, please
send me Mamma's letter, please
send me Mamma's letter, please
send me Mamma's letter, please."

LEADING GOVERNMENTS OF THE WORLD.

Of the 'leading' governments of the world
there are four principal ones: the British
Empire, the French Republic, the German
Empire, and the Russian Empire.

The British Empire is the largest
in the world, and is composed of
many different countries.

The French Republic is the second
largest in the world, and is
composed of many different countries.

The German Empire is the third
largest in the world, and is
composed of many different countries.

The Russian Empire is the fourth
largest in the world, and is
composed of many different countries.

The British Empire is the largest

THURSDAY, AUGUST 7, 1879. TIMBER CULTURE

Important to Pre-Emptors and Homesteaders.

In possession of our plot to give to our readers such information as may prove of practical interest to them as pre-emptors and homesteaders, we now devote some space to the subject of timber culture.

We have been blessed, thus far, in our history, as a nation, by the presence of plenty of timber suitable to every use of civilization. No timber, however, has been paid practically to the diminution of the supply, but the fact is that during the past decade the immense demand for timber has increased in some measure...

Eighty thousand miles of railroad taking two thousand tons to our mills, have required 100,000,000 of feet. Figures as such an instance do not lie, and to mention them to review the forests within the knowledge of a single individual would suggest the inquiry, where has this enormous quantity of timber been obtained. To the trans-continental traveler this question arises when crossing for hundreds of miles over hills with no vestige of timber growth in sight. The trip across the prairie east of the Missouri is open to the same remark.

The foregoing remarks apply more particularly to the forests of our Great West. There on the one hand of cedar and the oak are particularly protected by government. The policy of our government is to foster industry. The disinterested may come to

the conclusion by a brief review of the timber culture of the Great West. The timber lands, and it is the object of this article to glance at some of the provisions made for and privileges accorded to any who choose to avail of them, respecting the taking up, and planting in their own right, lands contiguous to their homesteads, or otherwise, by entering them as "timber culture lands." A homesteader is not a member of a floating population; he drives his stakes with a six years' point to them; grows up with his homestead, and his interests are his own; and it is his duty to develop the resources of the section. He has a quarter section. The law recognizing the fact that there is an end to natural timber growth, says to him, take up another quarter section, plant a certain number of trees on it; care for them for a certain time, and these proceeds of such care, and of the enhance at the end of a term of years of a young forest, and here is a patent for such land. What easier way is there to add to one's possessions? This side land can be utilized in various ways during the growth of the timber, and at once become a source of profit to him who avails of the opportunity to increase his domain. An act also provides that land so acquired shall not be liable in the satisfaction of any debt contracted prior to the issuing of the final certificate thereon. This is an additional advantage to the holder of limited means.

When a settler cannot plant a whole section, the law provides that he may improve a smaller quantity of land. The ratio required to be broken, planted, etc., in all entries under the act of June 14, 1876, is one-eighth of the land embraced in the entry, except when the entire tract is less than forty acres, in which case it is one-fourth of that quantity. This, on an entry of 160 acres is required that five acres covered thereby be broken or plowed the first year, and in addition the second year. The five acres broken or plowed during the first year he is required to cultivate by raising a crop or otherwise during the second year, and to plant in timber seeds or cuttings during the third year. The five acres broken or plowed during the second year he is required to cultivate by raising a crop or otherwise during the third year and to plant in timber seeds or cuttings during the fourth year. Tracts embraced in entries of a less quantity than a quarter section are required to be broken or plowed, cultivated or planted in trees, tree-seeds or cuttings during the same periods, and to the same extent in proportion to their total area as are provided for in entries of a quarter section. Provision is also made in the act for an extension of time where the trees, seeds, or cuttings planted should be destroyed by grasshoppers or by extreme and unusual drought.

At the expiration of eight years from the date of entry, or at any time within five years thereafter, the person making the entry, or if he be dead, his heirs or legal representatives, shall prove by two credible witnesses the planting, cultivating and protecting of the timber for not less than eight years according to the provisions of the act above named, and he, or they may take out a patent for the said land. But should the claimant at any time after one year from the date of entry, and prior to the issue of a patent for the land, fail to comply with any of the requirements of that act, his entry will be deemed null and void, and the land shall be open to the same extent as that which it was at the time of making such proof, there shall be growing at least 675 living and thrifty trees to each acre. The circular of the Commissioner, on this important subject, may be seen at the land office.

We lay these outlines of the law before our readers with a view to encourage them to take advantage of the act referred to. A peculiarity of this lovely country is the absence of shade trees and orchards. There are perhaps natural causes for the latter, but the former only requires to be introduced to be a success. In a part of the provisions of the act, would suggest a better aspect to the territory, and make it more inviting and attractive. The promise of forests, realizing healthily, and making shade, tends also by their

Legal-Camas Creek Case Dismissed. Sheriff Watson arrived in our city on the 3rd instant with Mr. F. Lepere in custody on a charge of polluting the waters of Camas Creek by throwing therein slaughter house offal. The complaint was formulated on oath of the District Attorney, but no document was in court in the nature of a complaint on oath from any one at Camas Creek. A petition dated at the Terminus, (now Camas Creek), bearing between sixty and seventy names, set forth that Mr. Lepere had been arrested charged with having committed a nuisance by damaging the waters of the creek by offal, and the signatories declared the slaughter house was not a nuisance; that the offal had not been thrown into the waters to the damage thereof; that the building was half a mile distant from the town, and two hundred feet from said creek, and at a point far below that from which water was taken for use by the residents; that in their opinion the complaint was actuated by malice, Mr. Lepere not being the resident member of the firm, and that the Sheriff was thus compelled to travel fifty or sixty miles to make the arrest, thereby entailing additional and unnecessary costs to the extent of twenty-five or thirty dollars to the county; and as the memorialists, citizens of the said place had not complained of any nuisance, nor requested that the house be removed; nor had authorized any one to institute proceedings, they prayed that the complaint be dismissed.

The court had no evidence to support the allegations, and Squire Finney dismissed the case. The costs in the case have to be borne by the county, and will amount to nearly two hundred dollars. We think there should be a provision of

law that where persons offer information in such premises they should be required to support it by evidence. The petition of the Camas residents shows that in their opinion no cause of action existed, and they firmly pronounce the proceedings against their fellow resident, as malicious. The District Attorney is in neither telephonic or telescopic communication with points in his circuit, and we think that he should hold strictly to account whoever presumes to set the machinery of the court in motion on bases unsupported by some proof of a violation of law, or compel them to provide for the expenses of acts, such as the Camas Creek people assert are unjust and malicious, as it is wrong to saddle the tax payers with costs of prosecutions which fail to have any merit.

The New West. The new North West is opening up with a rapidity which seems almost magical. Kansas and Nebraska are no longer the "Far West." For the past four or five years the immense stream of emigrant wagons marching westward, bound for Oregon and Washington Territory, would seem to be sufficient to overrun those places with settlers. But the recent opening of the Utah & Northern Railway, and the discovery of rich gold and silver mines on Salmon river, is now opening up that vast wilderness of Western Idaho and Southern Montana. So rapid is the settlement, that the same ground which was held last season by the hostile Hannocks, and was the scene of the oft-repeated bloody frontier strife, is now occupied by towns and villages, and the herds of prosperous ranchmen, and the music of the mill, the whistle of the locomotive, and the busy hum of industry and civilization have taken the place of the Indian war whoop and smoke of the wigwam all in the short space of one year. At the present rapid rate of settlement, within the next quarter of a century there will be no wild frontier in all this broad land. All the arable soil will be cultivated and rendered subservient to the wants of man, and the spread of civilization. At present there are opportunities for securing good lands. It does not matter how far you may have to go from the present settlements to set your stakes, the settlements will soon come to you, and in the near future these opportunities will be passed forever to you and your posterity. [Utah Chief-tain.]

The Idaho Enterprise, TERMS: \$4.00 A YEAR. ADDRESS ENTERPRISE PUBLISHING CO., OXFORD, OREGON CO., IDAHO.

Legal Notice. NOTICE OF HOMESTEAD PROOF. LAND OFFICE AT OXFORD, IDAHO, July 18, 1879.

NOTICE IS HEREBY GIVEN that the following named settler has filed notice of his intention to make final proof in support of his claim, and secure final entry thereof...

BY VIRTUE OF AN ACT OF THE Legislature's Assembly of the Territory of Idaho, entitled "An Act in provide for the disposal of lands entered as Town Sites, under the acts of Congress..."

The Idaho Enterprise THURSDAY, AUGUST 7, 1879.

NOTICE The "Enterprise" is the newspaper in this section of Idaho designated by the Departments of the General Government for the publication of official notices and advertisements.

The rate for advertising a notice of intention to prove up, either homestead or pre-emption, is FIFTEEN DOLLARS. Such notices will appear for five consecutive weeks, as required by law.

P. S. - FORTY PER CENT. will be deducted from the above rate from August 6th to December 31, 1879.

WANTED - A few tons of hay; inquire at the Enterprise office.

The Enterprise is on file at the following places, where advertising rates may be had by inquiry: H. E. Baker, 21 Mission Street, San Francisco; Geo. T. Howell & Co., 41 Park Row, New York; E. N. Freshman & Co., Cincinnati; Public Library, Washington, D. C.

Improvements. Mr. L. C. Morrison has begun the erection of a new house on Main street.

Mr. Shaffer is building a house on Main street, intended as a news, cigar and fruit stand. He announces that he will have a tonnage branch there.

Mr. Peterson is also preparing to build himself a residence on Main street, near Mr. Singler's villa.

New Advertisements.

Mr. J. B. Messer, of Salt Lake, is prepared to show to prospectors the results of their operations, and to furnish them with the latest information in prospecting the precious metals.

We invite attention to the advertisement of Messrs. Walker Bros., who have opened a strictly wholesale dry goods house in Ogden. Their knowledge of the wants of this section of the world will enable them to meet the demands of the retail trade at prices defying competition. We wish them success.

Mr. James Gale appears as an able and willing to assist in the very important business of household furnishing. His advertisement speaks for itself, and customers should give him a call, and prove his assurance.

Personal. Dr. Dodge and Under Sheriff Jones were in our city last week, and left on Friday for Marsh Valley.

Major Danahorn and High and Mr. Stont were in our city last week. Major Danahorn speaks in good terms of the industrious character of the Indians under his charge. We hope soon to be able to visit, by his kind invitation, and inspect his field of labor, and see the results of his able management of affairs.

Mr. Mansford Smith of Cincinnati, Ohio, paid our young city a visit during the past week. He has for many years been the senior member of the celebrated law firm of Smith, Young & Co. of Cincinnati. Mr. Young being Ex-Governor Toss. Young now a representative in Congress from the First District of Ohio. Mr. Smith is a well known and respected lawyer in his native city, and has been a leading figure in the legal profession of the West. He is highly pleased with the prospects of Southern Idaho, its healthy climate and excellent agricultural advantages, as well as its mining prospects. He will continue to visit with us and grow up with the country friends.

Almost a Serious Accident.

As Under Sheriff Jones and Dr. Dodge were leaving Malad City last week for Oxford, their team became restive, and at last, in the middle of the street, the carriage was overturned, throwing Dr. Dodge from the carriage. We are glad to say that he was only well shaken up, but not injured. The dust raised on the occasion must have rendered the doctor of the late residence at Eagle Rock. Our friend had not yet got into the carriage, and so escaped the first shock. Some second was needed in the vicinity of Bear River. While passing that stream, and when midway across, the single tree broke. Imagine our nearly entire of the law "on disability" in the middle of Bear River, seeking in its swift running waters for the refractory single tree. His perseverance was well rewarded however, and the "injured" was safely crossed. Without further accident they arrived safely home by way of Franklin.

The Artotype.

Mr. Hoffman has exhibited to us some specimens of the artotype, an improvement in photographic printing which is destined to supersede the old style of printing in that art. The printing of the picture is not dependent on sunlight, as by the "artotype" process, printed plates are used. The modifications in color, shading and detail are wonderfully easy and precise. Mr. Hoffman intends securing the patent for this section of the West. His headquarters are at Ogden, but he is now on an artistic tour through Oneida and Bear Lake counties.

We invite the careful attention of farmers, ranchers, and settlers to the facilities for purchasing dry goods and groceries in Ogden. They can save time and expense by coming here and examining the extensive stock of our enterprising merchants. See their advertisements in the appropriate columns.

PUBLIC MEETING.

There will be a meeting at the school-house, on Saturday evening at 8 o'clock, for the purpose of considering the question of organizing an Agricultural and Stock Association. Let there be a full attendance of farmers and others.

(Special) L. W. PHELAN, WILLIAM SHAWFORD, W. H. HOMER, W. F. FISHER.

Special Reduction in Advertising Rates to Settlers. From this date, and until the end of the current year, the legal notices of intention to prove up, to be given for thirty days by pre-emptors and homesteaders, will be inserted in this paper at a reduction of Forty Per Cent. from the established rates, making the sum to be deposited at the Land Office for advertising such notices, NINE instead of FIFTEEN dollars.

We have taken pains and expense to learn the real facts relating to the condition of crops in this district this present harvest, and find that several causes have made them short. It is unnecessary here to detail the varied statements and complaints made hereupon by the better part of them, and find that these circumstances make it pretty hard for numbers of our settlers to meet the small expenses here of proving up on their lands, most of them having families to support.

We pointed out in a former issue the peculiar position that some of the settlers are in, owing to carelessness or to an ignorance of law relating to the time within which proofs must be made.

We come here to assist the people in their legitimate enterprises and to help develop and improve the country. Appreciating their position, acting on that principle, and sympathizing with them in their want of good crops, we have made the reduction above stated, to show a lowering of our standard, and under the circumstances, to assist in the settlement of a large amount of business, as an act of good will, and a small assistance to them, under such circumstances, we hope to be of some temporary assistance.

Respecting the North.

Mr. J. C. Vanover recently returned from a prospecting tour extending from Franklin to Cariboo. Mention was made in the Herald about four months ago of the gentleman's start upon the trip. Mr. V. reports some promising discoveries. Among them, a well-defined ledge near Oxford, Idaho, assays from which show \$3,000 in silver. Another location made by him is a lead vein, which shows no trace of silver. Fifteen miles from Franklin, Idaho, he discovered a ledge carrying \$115 in silver and 35 per cent. lead. The gentleman is well pleased with his summer's work, and has returned for the purpose of continuing his search for the precious metals until the coming fall. - Salt Lake Herald.

Yankee Park Notes.

A piece of ore from the bottom of the Montana shaft assayed \$200,000 per ton. The shafts have found some very rich ore at the mouth of Leon creek, on the Middle Fork of the Salmon. It is rich as any at Yankee Park. An excitement followed, and about 100 men have gone to the new field in prospect. About thirty men are at work on the wagon road from Bonanza City to Challis. All the lumber that is being sawed at Bonanza is used in building. - Idaho World.

We have received the "Prairie Farmer," a most instructive, interesting, and reliable agricultural paper. No farmer should be without it. It gives information in every department of agricultural industry, and is a "vade mecum" for the intelligent farmer. It has become a "household word" in thousands of families in the land, and is an always welcome visitor.

The District Court for the third judicial district of Idaho was to convene at Salmon City on the 4th inst. We understand that they have a full docket, and that the sitting may be quite a protracted one.

There were 117 deaths from yellow fever in Havana during the week ending July 26.

A Mammoth Lead.

Dr. J. L. Stephens gives the following description of the lead which he has located with C. Jacobs and Charles Himrod. The lead is not to exceed eight miles from town and a short distance to the right of the Idaho City road on this side of the summit. It crops out at the point of discovery three feet high and is from two to ten feet wide. He thinks the lead will average eight feet on the surface and can be traced three miles. They brought down rock and had two assays made. The lowest went \$25 80, and the highest \$308 to the ton in free gold. They call it the Palmer lead, and have located 3,000 feet, and 8,000 feet of extensions have already been located by other parties. Doctor Stephens says that this mountain range is full of quartz, and is as good a mineral belt as there is in the Territory. - Idaho Statesman.

Every man's past life should be his critic, his censor, his guide. He who lives and is done with life the moment it drops from his hands, is not half a man. He is like a plucked plant that stands in water, without roots of its own, and can have no growth, and soon fades and passes away.

Traveler's Guide.
